

Thursday 15th May		
Room 1	Room 2	
9-9:10	Opening Ceremony (Daniela Klein, Philippe Camuset)	
9:10-9:15	Rosenberger award	
9:15-12:45	Recent advances in diagnosis (Chairwoman: Daniela Klein)	Metabolic disease and regulation of inflammation (Chairman: Walter Gruenberg)
9:15-10:00 : Key note	Mat Scott: About Omics and perspective for diagnosis	Jessica Mc Art: About recent advances in calcium and phosphorus disorders in cattle
	Metagenomic characterisation of lower respiratory tract virome of pre-weaned dairy calves in Estonia - association with lung consolidations, clinical disease and inflammatory markers (Kerli Motus, Estonia)	A review of integrated livestock systems using machine learning techniques: trends and gaps from animal welfare, sustainability and one health perspectives (Diego Scuso, Italy)
10:00-10:15	Assessment of the impact of paromomycin at 150 mg/kg on gut microbiota in healthy calves (Damien Achard, CEVA)	A novel consolidated blood biomarker index to promote animal welfare and health monitoring (Léonard Théron, RumeXperts)
10:15-10:30		
10:30-11:15	Coffee break & Poster session	
	BRD Session (Chairman: Edouard Timsit)	Udder Health 1 (Chairman: Frédéric Lemarchand)
11-15-11:30	Association between housing, management and environmental factors and respiratory disease prevalence in dairy calves (John Donlon, Teagasc)	Dynamics of udder health key performance indicators: a national perspective 2017-2023 (L. Boye Astrup, DK)
	Intranasal vaccination of calves in the first week of life: duration of shedding of vaccine virus & effect on specific serum IgG titers (Linde Gille, MSD)	Effect of additional prednisolone in the intramammary treatment of clinical mastitis (Jantijn Swinkels, NL)
11:30-11:45	Inflammatory markers as potential indicators for ultrasound-confirmed bronchopneumonia in calves (Helen Kirjonen, Estonia)	Treatment of clinical and subclinical mastitis at calving with cephalosin in cows subject to selective dry cow therapy in Hungary (Peter Kovacs, Hungary)
11-45-12:00	Randomized field trial in veal calves on the efficacy of NSAID treatment for pneumonia using ultrasonographic lung reabsorption as a cure criterion (Laurens Chantillon, Ghent)	Evaluation of an on-farm test kit for the selective antimicrobial treatment of clinical mastitis on a large dairy farm in the United Kingdom (Peter Plate, UK)
12:00-12:15	Use of thoracic ultrasound as a diagnostic tool to identify and evaluate corrective actions during an outbreak of Mannheimia haemolytica and bovine Coronavirus in a commercial dairy farm (Sabrina Bertani, Italy)	Bovine mammary excretion of Salmonella Dublin: fact or fiction? (Yves Millemann, ENVA France)
12:15-12:30		
12:30-14:00	Lunch & Poster session	
14:00-17:00	Climate change and sustainability (Chairwoman: Susana Astiz)	Antimicrobials stewardship (ATB, AP) and One Health (Chairman: Nicolas Masseur)
14:00-14:45 Key note	David Black: Climate change and sustainability. The role of practitioner	Eric Morgan: Update on antiparasitic resistance
14:45-15:00	Risk factors for insufficient silage quality in German dairy farms (Martina Hoedemeker, Hannover)	Prevalence and antimicrobial susceptibility of bacterial species associated with interdigital phlegmon (footrot) lesions in French adult cattle using interdigital swab culture (Anne Relun, Oniris, France)
15:00-15:15	Association of AI-predicted milk yield residuals to behavioral patterns and transition success in multiparous dairy cows (Celien Kemeel, Ghent)	Botulism in cattle: Assessing risk factors and vaccination interest in the Netherlands (Deborah Smits, NL)
15:15-15:30	Evaluation of 7 critical success factors on 39 Belgian dairy herds by using an overall risk analysis tool as a herd management tool (Koen de Blecker, DGZ Belgium)	Effect of deltamethrin on intramammary infections, qualitative and quantitative parameters of the milk, stress and fatigue status and antioxidants profile in Holstein cows during peak lactation period under heat stress conditions (Elias Papadopoulos, Greece)
15:30-15:45	How far can fecal material be transported on tires? (Betina Baekdal Tvistholm, Denmark)	A novel tool designed to measure and support appropriate reduction of parasiticide use in cattle (Jenny Allan, UK)
15:45-16:00	Protein reduction strategies in dairy nutrition: Maximizing efficiency and performances through amino acid balance (Emilie Knapp, RumeXperts)	Q fever awareness among European ruminant farmers (Raphaël Guatteo, Oniris, France)
16:00-16:15	Post-alert management of dairy cows in sensor-based health monitoring systems: Veterinary involvement and antibiotic use (Joachim Lubo Kleen, Alta Genetics)	Resistance in veal calves at slaughter in Germany. Changes over time and potential association with antimicrobial use (Bernd-Alois Tenhagen, Germany)
16:15-17:00	Coffee break & Poster session	
17-19h	AGM ECBHM	
Dinner	GALA DINNER	

Friday 16th May		
Room 1	Room 2	
9h-12h45	Reproduction (Chairman: Olivier Crenn)	Immunology and infectious diseases (Chairman: Jean-François Valarcher)
9:45 Key note	Sylvie Chastant: recent update in uterine health	Sarah Depenbrock (ACVIM Speaker): recent update on diagnostic of BRD
9-45-10:00	The economic impact of a systematic application of fertility programs in lactating dairy herds, an European perspective (Federico Randi, CEVA)	Development of a classification system for lung ultrasonographic findings in calves based on the association with cure and production outcomes (Stan Jourquin, Ghent)
10:00-10:15	Strategic trace mineral injection to improve reproductive performance in beef cows in Belgium (Pauline Delhez RumeXperts)	Clinical, laboratory and ultrasonographic findings in 21 adult cattle with acute infectious bronchopneumonia (Nicolas Masset, France)
10:15-10:30	Risk factors for ultrasound-diagnosed endometritis and its impact on fertility in Scottish dairy cattle herds (Richard Vazquez Belandria, Scotland)	Procalcitonin as a diagnostic biomarker in bovine respiratory disease: associations with lung lesions and etiological agents in preweaned dairy calves (Giuliu Sala, Italy)
10:30-11:15	Coffee break & Poster session	
	Udder Health 2 (Chairman: Olivier Salat)	Update on BTV outbreak (Chairwoman: Charlotte Warembourg)
11-15-11:30	Mastitis therapy in Norway: Comparing local to combined systemic and local penicillin treatment of clinical mastitis (Maria Thorell, Norway)	Clinical manifestation of Bluetongue serotype 3 in ruminants in Flanders, Belgium (Wouter van Mol, DGZ Belgium)
11:30-11:45	Ketoprofen as the sole initial treatment for mild and moderate bovine mastitis: efficacy and antibiotic reduction (Volker Kromker, Germany)	Herd- and animal-level bluetongue antibody prevalence and risk factors in Dutch dairy cattle herds after the 2023 bluetongue serotype 3 epidemic (Katrien van den Brink, GD, NL)
11-45-12:00	SmartDCT: Selective dry cow therapy made simple (Luc Durel, Virbac)	High efficacy in sheep of Bultavo 3 vaccine against BlueTongue virus serotype 3 (Mathieu Chevalier, BI)
12:00-12:15	Impact of residues in colostrum from first generation cephalosporin treated cows at drying off on antimicrobial resistance in neonatal dairy calves (Jantijn Swinkels, NL)	Abortion and congenital abnormalities due to bluetongue virus serotype 3 in southern Belgium (Laurent Deloiz, ARSIA Belgium)
12:15-12:30	Sensitivity of isolated strains of bovine mastitis to trimethoprim (TMP), sulfadiazine and the TMP-Sulfadiazine combination (Guillaume Lequeux, France)	Clinical observations in a randomized trial with two different treatments for bluetongue in sheep (Ruurd Jorritsma, Utrecht NL)
12:30-14:00	Lunch & Poster session	
14:00-17:00	Promoting calf health (Chairwoman: Iris Kolkman)	Welfare, lameness and pain management (Chairman: Arnaud Sartelet)
14:00-14:45 Key note	Ingrid Lorenz: Recent advances in the management of the first days of a calf's life	Nicola Gladen : Pain detection and management with special focus around calving
14:45-15:00	Field evaluation of immune transfer in suckler calves using a brix scale refractometer (Jérôme Chantreau France)	Prevalence of foot lesions and their association with carcass characteristics in french young bulls (Sarah Istak, Oniris, France)
15:00-15:15	Cost assessment of cryptosporidiosis in dairy cattle (Bas Burger, WUR, NL)	Comparison of a salt solution and formalin to control digital dermatitis in dairy cattle: an in-vitro study and a non inferiority field trial using a split footbath design (Arne Vanhoudt, GD, NL)
15:15-15:30	Managing neonatal calf diarrhoea besides antibiotics: a European perspective (Cassandra Eibl, Vienna)	Lumbosacral subarachnoid injections and anesthesia in calves : impact of the needle choice on injection success rate and central neural trauma (Gwenola Touzot-Joude, ENVA, France)
15:30-15:45	Evaluation of existing and novel sepsis scores in sick calves (Mathilda Pas, Ghent)	A novel recessively inherited syndromic form of bovine spastic paresis in Brown Swiss cattle (Joana Jacinto, Switzerland)
15:45-16:00	Systemic pasteurellosis in calves: Investigating Mannheimia haemolytica serotype A2 as a potential contributor to fatal systemic infections (Jennifer Reinhold, Germany)	Inter-observer agreement between veterinarians and hoof-trimmers in recognising and grading bovine hoof lesions to fatal systemic infections (Anne Relun, Oniris)
16:00-16:30	Coffee break & Poster session	
16:30-16:45	Regenerative medicine for dairy calves: health management: a clinical trial assessing the efficacy of Leukocyte Platelet Rich Fibrin for tissue regeneration after disbuddding (Jacopo Guccione, Napoli, Italy)	Effects of individual compared to pair housing of dairy calves on production until the end of first lactation in the UK (Sophie Mahendran, RVC, UK)
16:45-17:00	Determining the nutritional status of Belgian blue calves hospitalized using metabolites and cholesterol (Justine Eppe, Liège, Belgium)	Long-distance transport of beef cattle to the fattening unit: impact of live yeast and selenised-yeast on blood metabolites and reticulo-rumen pH in newly received Charolais bulls (Clothilde Villot, Lallemand)
17:00-17:15	Dutch BVDV control program: Evaluation 2018-2023 (Emma Strous, GD, NL)	Evaluation of the water intake of pre-weaned calves with a focus on heat stress using on-farm digital technologies (Malina Flessner, Vienna)
17:15-17:30	Monitoring IDV in northern Italy: Virological and serological surveillance in dairy farms (Emilia-Romagna and Lombardy regions, 2018-2024) (Alice Prosperi, Italy)	Comparative analysis of climatic indices using generalized additive models: Assessing the impact of the most suitable indices on circadian behaviors of grazing cattle in summer conditions (Sébastien Czaplinski, Belgium)
17:30-]	Cloture Ceremony (Raphaël Guatteo)
